

Innovative Teaching Practices : 2017-2018

Smart Board Teaching: It is an effective method of bringing classroom situations into real life for facilitating the students to engage in multiple thinking. Course contents are made more interactive through digital platforms where the teacher presents new concepts, demonstrates various contexts of information, explore implications and correlates the knowledge domain. Smart Board teaching is being executed for improvement in collaboration and interaction between teacher and student as well as hands on learning experience.

Collaborative Teaching: This method of teaching is meant for making the students work together for achieving certain goals. Life centric skills are imbibed among the students in order to foster progressive learning. Entire responsibility is entrusted with the student groups in which the qualities of empathy, team- work, negotiation, trust and problem solving ability enhances. The teacher simply guides, mentors and supervise the students.

Teaching with Humor: Combining both teaching and learning is a challenging task. Teaching with the sense of humor strengthens the relationship between teacher and student, reduces the stress and increases the interest level. Through laughter and amusement the teacher creates a conducive learning environment.

Crossover Teaching: It is the method of combining both formal and informal learning for enriching the teaching and learning process. The teacher strategizes to link the learning contents with experiences of learners. Students have to explore and work out through field trips, visit to outskirts, group assignment, etc. This facilitates in creative outlook, comprehending ability and introspection.
